

Set Sail for Success

in your Family, Career, and Community

Dynamic leaders know where they are going, have goals to get there, and solve problems along the way.

Vision

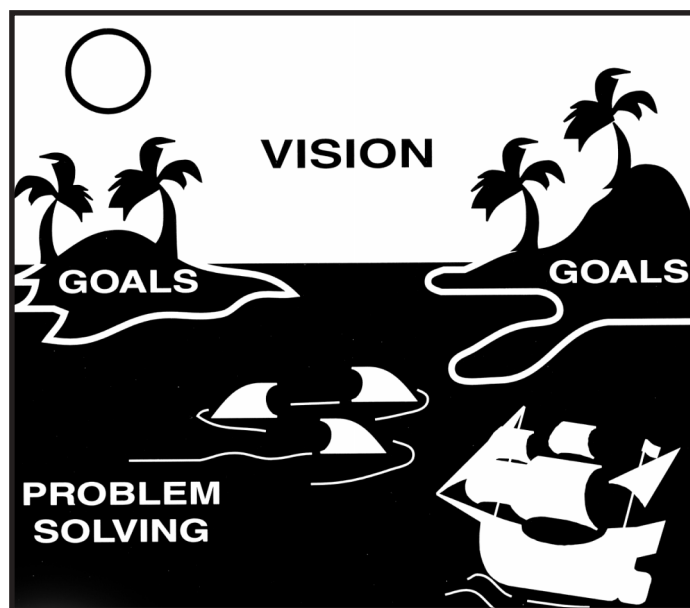

Vision is the ideal situation you want to bring about. It is a future that seems achievable yet challenges people to accomplish things they never have before. Dynamic leaders define, commit to, and communicate great visions.

Goals

Goals are checkpoints on the way to your vision. They guide you step-by-step toward success. Dynamic leaders set goals that are SMART—specific, measurable, action-oriented, realistic, and timely.

Problem Solving

Problems will pop up in everyone's journey to success. Problems can be identified, defined, analyzed, and addressed. Dynamic leaders help others find creative, effective solutions to problems.

“Without goals, and plans to reach them, you are like a ship that has set sail with no destination.”

—Fitzhugh Dodson
